

ELISpot Kits 2024 Catalogue

ELISpot Kits can be used to monitor cellular immune responses at the single-cell level and reliably detects and measures human cytokine secretion by stimulated effector cells.

Item	Size	Cat. Number	Description
ELISpot Human IL-2	1 plate	2053-01	Kit contains: 1 or 5 plates precoated with IL-2 capture antibody. Reliably detects and measures human IL-2 secretion by stimulated effector cells.
	5 plates	2053-05	
ELISpot Human TNF-α	1 plate	2048-01	Kit contains: 1 or 5 plates precoated with TNF- α capture antibody. Reliably detects and measures human TNF- α secretion by stimulated effector cells.
	5 plates	2048-05	
ELISpot Human IFN-γ	1 plate	2091-01	Kit contains: 1 or 5 plates precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by stimulated effector cells.
	5 plates	2091-05	
Avian Influenza ELISpot Human IFN-γ Kit	1 plate	3057-01	Kit contains: ImmuneSelect H5N1 Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by H5N1 stimulated effector cells.
	5 plates	3057-05	
Cytomegalovirus ELISpot Human IFN-γ Kit	1 plate	3095-01	Kit contains: ImmuneSelect CMV Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by CMV stimulated effector cells.
	5 plates	3095-05	
Epstein-Barr Virus ELISpot Human IFN-γ Kit	1 plate	3016-01	Kit contains: ImmuneSelect EBV Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by EBV stimulated effector cells.
	5 plates	3016-05	
Herpesvirus 6 ELISpot Human IFN-γ Kit	1 plate	3066-01	Kit contains: ImmuneSelect HHV-6 Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by HHV-6 stimulated effector cells.
	5 plates	3066-05	
Lyme Disease ELISpot Human IFN-γ Kit	1 plate	3038-01	Kit contains: ImmuneSelect Lyme Disease Peptide Pool for cell stimulation and 1 or 5 plate precoated with IFN- γ capture antibody. Reliably detects and measures human IFN- γ secretion by Lyme Disease stimulated effector cells.
	5 plates	3038-05

ELISpot Kits 2024 Catalogue

Item	Size	Cat. Number	Description
Respiratory Syncytial Virus ELISpot Human IFN-γ Kit	1 plate	3074-01	Kit contains: ImmuneSelect RSV Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN-γ capture antibody. Reliably detects and measures human IFN-γ secretion by RSV stimulated effector cells.
	5 plates	3074-05	
SARS-CoV-2 ELISpot Human IFN-γ Kit	1 plate	3025-01	Kit contains: ImmuneSelect SARS-CoV-2 Peptide Pool for cell stimulation and 1 or 5 plates precoated with IFN-γ capture antibody. Reliably detects and measures human IFN-γ secretion by SARS-CoV-2 stimulated effector cells.
	5 plates	3025-05	
Avian Influenza ELISpot Human Collection Kit	3 plates	4075-01	Kit contains: ImmuneSelect H5N1 Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by H5N1 stimulated effector cells.
	15 plates	4075-05	
Cytomegalovirus ELISpot Human Collection Kit	3 plates	4006-01	Kit contains: ImmuneSelect CMV Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by CMV stimulated effector cells.
	15 plates	4006-05	
Epstein-Barr Virus ELISpot Human Collection Kit	3 plates	4041-01	Kit contains: ImmuneSelect EBV Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by EBV stimulated effector cells.
	15 plates	4041-05	
Herpesvirus 6 ELISpot Human Collection Kit	3 plates	4072-01	Kit contains: ImmuneSelect HHV-6 Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by HHV-6 stimulated effector cells.
	15 plates	4072-05	
Lyme Disease ELISpot Human Collection Kit	3 plates	4093-01	Kit contains: ImmuneSelect Lyme Disease Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by Lyme Disease stimulated effector cells.
	15 plates	4093-05	
Respiratory Syncytial Virus ELISpot Human Collection Kit	3 plates	4050-01	Kit contains: ImmuneSelect RSV Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by RSV stimulated effector cells.
	15 plates	4050-05	
SARS-CoV-2 ELISpot Human Collection Kit	3 plates	4018-01	Kit contains: ImmuneSelect SARS-CoV-2 Peptide Pool for cell stimulation and 3 or 15 precoated plates (1 or 5 plates per analyte: IFN-γ, L-2, and TNF-α). Reliably detects and measures human IFN-γ, IL-2 and TNF-α secretion by SARS-CoV-2 stimulated effector cells.
	15 plates	4018-05
